What THK?

- # 3 days hackmeetings shaped after hk.it and hk.es, extending the movement over traditional geo. borders
- # DIY spirit vs. high efficiency
- # Self-organised (autonomous survivalist)
- # Reality hacking highly encouraged
- # Donations collected via food sessions -> streaming financial controlling -> ask for more/less
- # Connect with neighbours

Why Istanbul?

- # Gateway to the Middle East
- # Turkey faces high level of state censorship:
 - # Big web sites like YouTube and Blogger completely blocked, because of single offending contents
 - # Writers regularly charged for “Insulting Turkishness” (Article 301) – at least 8 authors currently prosecuted
 - # TV show about state corruption banned from screening
- # Hacker scene flooded by ultra-nationalist defacers
- # Still: The president admits watching YouTube every day
- # Public awareness on how to circumvent censorship
